THIS REPLACES YOUR PREVIOUS SPF REPORT!

What's New?

We have added detail to Summary Scores (2 decimal points)

** This now avoids a rounding "down" that occurred previously - therefore some schools have slightly higher Summary Scores for the Domains.*

We have added Staff Survey data even if the N was below 20, since some schools have very small staff.

** This means if schools had 55% staff participation their data is represented - therefore, a few schools have a slight increase or decrease in this indicator score, as well as their Over-all Tier.*

Mistakes Happen... a principal helped us find an important one.

We have fixed inaccurate Suspension Growth Data for Lowest Performing Racial Group (LPRG).

** This was linked to an incorrect data set - therefore, some schools have a slight increase or decrease in this indicator, as well as their Over-all Tier.*
